CAREER OBJECTIVE

Motivated Software Developer and aspiring Full-Stack Engineer with experience in in full-stack development and computer vision, eager to build impactful applications and grow through collaborative, innovative projects.

EDUCATION

Bachelor of Computer Applications, University of Mysore, Karnataka

2022 – 2025

CGPA: 8.71/10

TECHNICAL SKILLS

Programming Languages : Python, PHP, JavaScript, HTML, CSS, SQL.
Frameworks & Libraries : React, TensorFlow, Keras, OpenCV, Tailwind CSS.
Databases & Tools : MySQL, GitHub, Linux, REST APIs, Netlify, Github.

EXPERIENCE

Full-Stack Web Development Intern | Anurva Advanced Techserve Pvt. Ltd

Dec 2024 - Apr 2025

Mysuru, Karnataka

- Developed and deployed **MERN stack applications** with CRUD APIs and JWT authentication.
- Built responsive frontends using React and integrated REST APIs.
- Deployed applications on **Netlify**, reducing deployment time by **40%**.
- Collaborated in an Agile team, improving project delivery efficiency.

PROJECTS

Leaf Disease Detection using CNN | [GitHub](#)

- Built a CNN model to detect and classify leaf diseases with 99% validation accuracy.
- Deployed using Streamlit for real-time predictions.
- Technologies: Python, TensorFlow, Keras, OpenCV, Streamlit.

Personal Portfolio Website | [Live](#) | [GitHub](#)

- Designed and developed a portfolio using React, Vite, TypeScript, Tailwind CSS.
- Implemented dark mode theming and optimized build performance with SWC.

Object Detection with YOLOv8

- Trained YOLOv8 model on a custom dataset for real-time object detection tasks.
- Enhanced detection accuracy through data preprocessing and augmentation.

CERTIFICATIONS

- Cybersecurity Analyst Job Simulation - **Tata Group**.
- Data Analytics Job Simulation - **Deloitte**.
- Solutions Architecture Job Simulation - **Amazon Web Services**.
- CSS, SQL, Python, Java certifications - **HackerRank**.
